**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A flower ornamental assembly comprising:
  - a flowerpot;
  - a support post having a lower part buried in the ground or fixed to the ground with a fixing device so as to be erected upward;
  - a flower ornament pot having at the upper end an opening for ~~accommodating the flowerpot~~ and having at the lower end a through-hole through which the support post is inserted; and
  - a tilt preventive member placed in the flower ornament pot around the support post ~~in a situation that the support post is inserted through the through-hole of the flower ornament pot~~, for cooperating with the support post to erect and support the flower ornament pot; and
  - a flowerpot resting on the opening of and being in contact with the flower ornament pot, the support post terminating prior to the bottom of the flowerpot such that the support post does not penetrate or come in contact with the flowerpot.
2. (Original) The flower ornamental assembly according to claim 1, wherein the tilt preventive member is a filler filling a surrounding of the support post inside the flower ornament pot.
3. (Previously Presented) The flower ornamental assembly according to claim 1, wherein the tilt preventive member includes: a block body having a through-hole to allow the support post to insert in the vertical direction inside the flower ornament pot, and

~~restraining the inclination of the flower ornament pot within a specific range; and a buffer~~  
member filling a space between the block body, the flower ornament pot, and the support post.

4. (Original) The flower ornamental assembly according to claim 1, further comprising a height adjusting piece interposed between the flower ornament pot and the ground for adjusting a height position of the flower ornament pot.

5. (Original) The flower ornamental assembly according to claim 1, further comprising a pedestal integrally fitted to the lower end of the flower ornament pot,  
wherein the pedestal has a hollow space communicating with the through-hole of the flower ornament pot for inserting the support post.

6. (Currently Amended) A flower ornamental assembly comprising:  
a flowerpot;  
a support post having a lower part buried in the ground or fixed to the ground with a fixing device so as to be erected upwards; and  
a flower ornament pot having at the upper end an opening for accommodating the flowerpot and having at the lower end a through-hole through which the support post is inserted,  
wherein the flower ornament pot has a hollow tubular part integrally erected upward from the through-hole, and the flower ornament pot is erected and supported with the support post inserted in the tubular part, said support post terminating prior to the bottom of the flowerpot such that the support post does not penetrate or come in contact with the flowerpot.

7. (Previously Presented) The flower ornamental assembly according to claim 6, further comprising a filler filling a surrounding of the hollow tubular part within the flower ornament pot.

---

8. ~~(Cancelled)~~

9. (Previously Presented) The flower ornamental assembly according to claim 6 further comprising a rib reinforcement member formed on the hollow tubular part.
